PURECOAT with Microban® covers your walls with continuous, safe and durable protection.

Solvent free, non-polluting finish that is friendly to the environment.

No VOCs and low odor make it ideal for use in occupied areas such as hospitals, schools, hotels, offices and more.

Superior application features include excellent flow and leveling, hiding and spatter resistance, adhesion to a variety of properly prepared glossy surfaces, and soap and water clean up.

Acrylic formulation provides lasting, durable protection and excellent stain removal properties.

Ideal for use on new or previously painted interior surfaces including walls, ceilings, trim, doors and more.

Available in a variety of sheens.

FEATURING

Microban inhibits the growth of microorganisms (bacteria, mold and mildew) that can cause odors, stains, and deterioration of the paint film.

Because Microban is built-in to the paint during the manufacturing process, Microban® Protection will not wash or wear off, providing non-stop protection for the life of the paint film.

Microban Protection keeps painted surfaces cleaner and fresher between cleanings because it is present and effective throughout the product, even in hard to clean areas.
