

Columbia Industrial Primer Product Guide

Product Description & Suggested Uses

05-550

Universal H₂O Metal Primer White

Fast Dry, Rust Inhibitive, Water Clean-up

Markets Served: Virtually all! This product is ideal for interior and exterior use on both ferrous and non-ferrous metal surfaces.

07-450/07-455

Universal Metal Primer Red/Light Gray

Fast Dry, Rust Inhibitive, Phenolic

Markets Served: Metal fabricators, OEMs and painting contractors who need it all: the best in corrosion protection, quick dry-to-touch and recoat times, and a product that can be top coated with virtually any finish.

07-462/07-466

Quick Dry Metal Primer Red/Gray

Zinc Phosphate, Ferrous Metal Primer

Markets Served: Metal fabricators and OEMs who are looking for rapid dry, a reasonable price and have an expectation of product performance superior to lower priced shop primers.

07-022/07-026

Brushable Metal Primer Red/White

Zinc Phosphate, Corrosion Resistant

Markets Served: Consumers and painters who are looking for a conventional dry time product that can be brushed, rolled or sprayed, and that provides excellent corrosion resistance.

07-770/07-775

Shop-Prime Red/Gray

Lead Free

Markets Served: Economically priced for metal fabricators and manufacturers where price is the over-riding factor and long-term performance is secondary.
